

A collection celebrating some of the best essays from the Blackwell journals, Bioethics and Developing World Bioethics. Contributors include Helga Kuhse, Michael Selgelid and Baroness Mary Warnock, former Chair of the British Government's Committee of Inquiry into Human Fertilization and Embryology. Traces some of the most important concerns of the 1980s, such as the ethics of euthanasia, reproductive technologies, the allocation of scarce medical resources, surrogate motherhood, through to a range of new issues debated today, particularly in the field of genetics. Includes contributions that are still as hotly debated today as they were 20 years ago and serves as a salutary reminder that free and open discussion is vital to the health of the discipline itself. Includes eight sections comprising some of the journals best publications in methodological issues, the health care professional-patient relationship, public health ethics, research ethics, genetics, as well as beginning- and end-of-life issues. Will serve the academic bioethicists as well as students of bioethics as an excellent source book.

Identity, Learning, and the Liberal Arts: New Directions for Teaching and Learning, Number 103 (J-B TL Single Issue Teaching and Learning) (No. 103), Encyclopedia of Adverse Reactions & Interactions, Banana, Secrets of Echinacea, Defence Without the Bomb: the report of the Alternative Defence Commission,
